

Joshuah Elmore

Brandenburg, KY | joshelmore.elmore44@gmail.com | LinkedIn: linkedin.com/in/joshuah-elmore | GitHub: github.com/PlagueRC

Summary

Hands-on maintenance technician transitioning into data science. Experienced with industrial machinery, troubleshooting, and process optimization. Currently studying data science and programming to bridge mechanical systems with intelligent automation.

Education

- **TripleTen Data Science Bootcamp** — In Progress (2025)
- Earned college credit for AP Physics and AP Statistics (Brandenburg High School)
- Additional self-study in electronics, circuit design, Arduino, and automation systems.

Work Experience

Maintenance Technician — Powers Paper Company (PPC)

Brandenburg, KY | 2020 – Present

- Served as shift supervisor for several months during department transition.
- Operated and maintain Jennerjahn converting machines (JLS-73/84/Dual Unwind, JJF "Bluegrass," etc.)
- Troubleshoot pneumatic, hydraulic, electronic, PLC, and servo-drive systems.
- Train operators and coordinate maintenance schedules to minimize downtime.
- Implement process improvements that enhance reliability and output.

Skills

- **Technical:** Python, pandas, Jupyter Notebook, VS Code, Git/GitHub
- **Mechanical/Electrical:** PLC troubleshooting, pneumatics, sensors, motor control, circuit repair
- **Software/Tools:** Fusion 360, 3D printing, Siglent & Rigol test equipment
- **Soft Skills:** Problem solving, process optimization

Projects

- **3D-Printed Structural Bodies:** Designed and prototyped custom electronics housing and actuator attachments using 3D printing.
- **Electronics Learning Lab:** Built hands-on circuits using ATmega328P microcontrollers and bench instruments.
- **Predictive Maintenance Concept:** Exploring machine-data logging to anticipate mechanical faults.

Volunteer or Side Contributions

- Mentoring coworkers in basic troubleshooting and safe machine operations.
- Independent community repair and DIY electronics help.
